

TOKYO FOOD

東京フード株式会社

Corporate Profile

Tokyo Food Co., Ltd.

OUR THEME

Make a Contribution to Creating a Healthy and Rich Food Culture

Tokyo Food was established as a confectionery in 1967. Chocolate is our main product and we also produce and sell different kinds of confectionery materials. Tsukishima Foods Industry, an edible oil and fat maker, provided full support to us and we became a member of Tsukishima Food Group in 1974. In 1985, Tokyo Food moved to a new factory, which was prepared for business use chocolate, in Tsukuba.

Since then, we have been well accepted by many customers in the food industry, including confectioneries, bread, biscuit, and chocolate makers. We merge our chocolate manufacturing technique with the fat processing technology of the Tsukishima Food Group and then give full support to our customer to produce new products, bring smiles to consumers.

We provide safety and deliciousness to all of our customers by food materials and make a contribution to creating a healthy and rich food culture. This is a social mission of the Tsukishima Food Group and every employee makes all-out effort to achieve the goal.

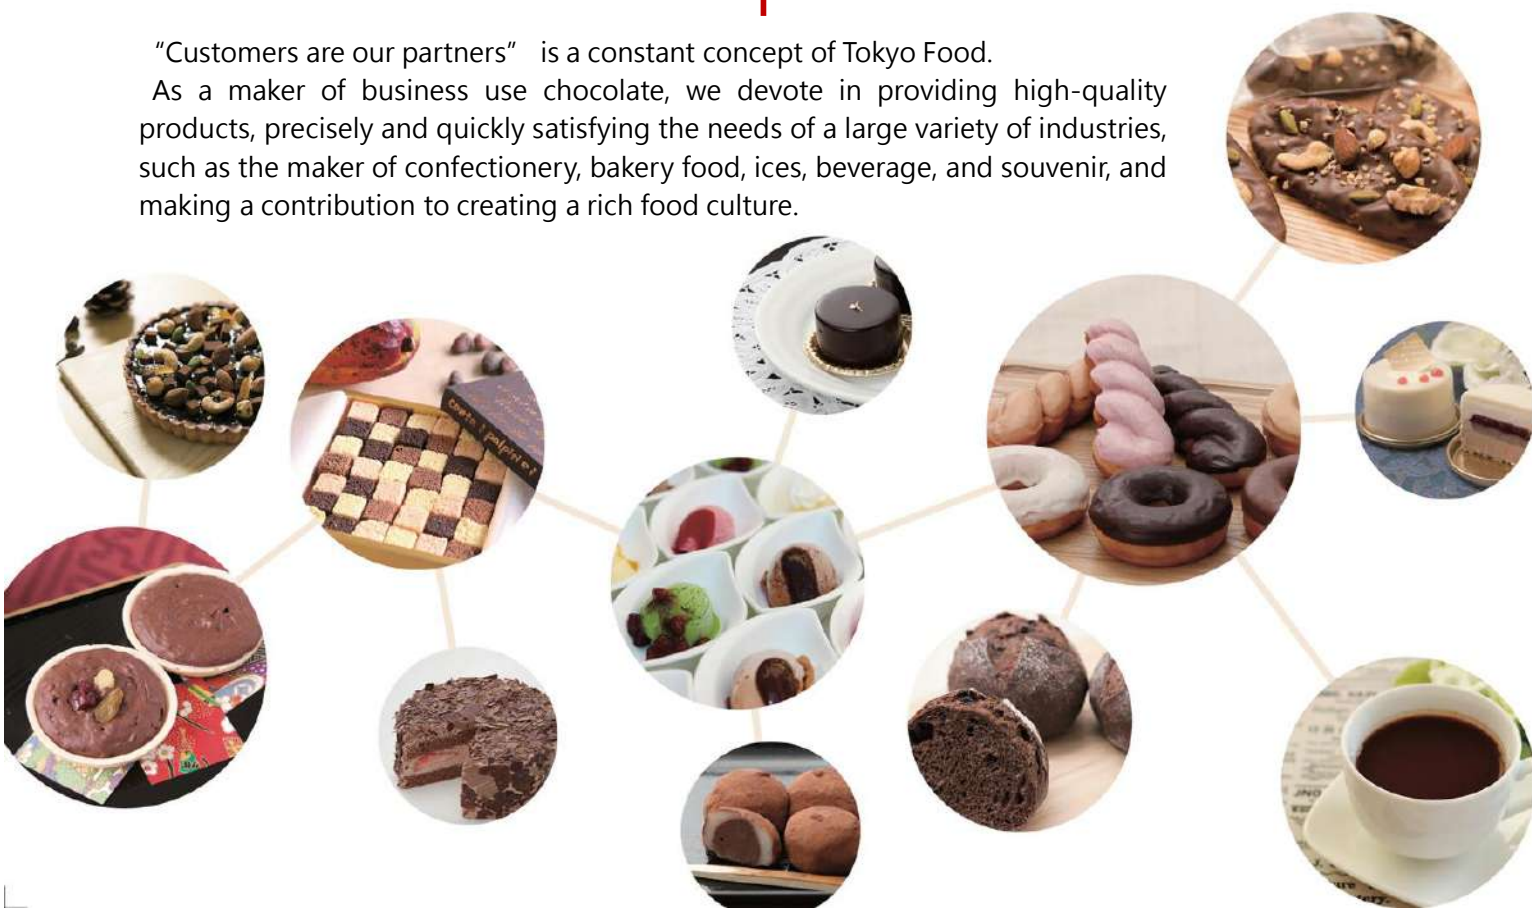

President
Seiko Kanno

BUSINESS DOMAIN

Customers are our partners

“Customers are our partners” is a constant concept of Tokyo Food.

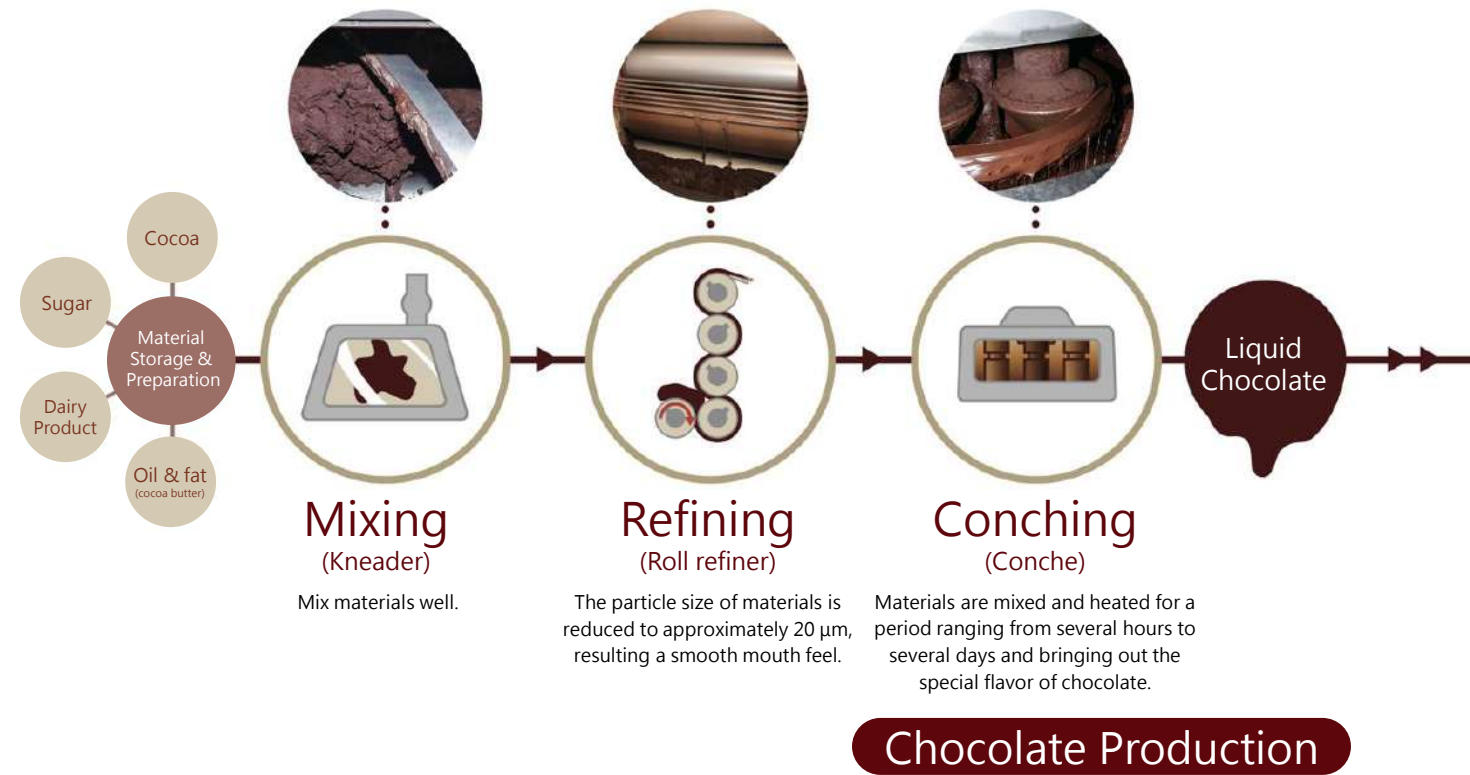

As a maker of business use chocolate, we devote in providing high-quality products, precisely and quickly satisfying the needs of a large variety of industries, such as the maker of confectionery, bakery food, ices, beverage, and souvenir, and making a contribution to creating a rich food culture.

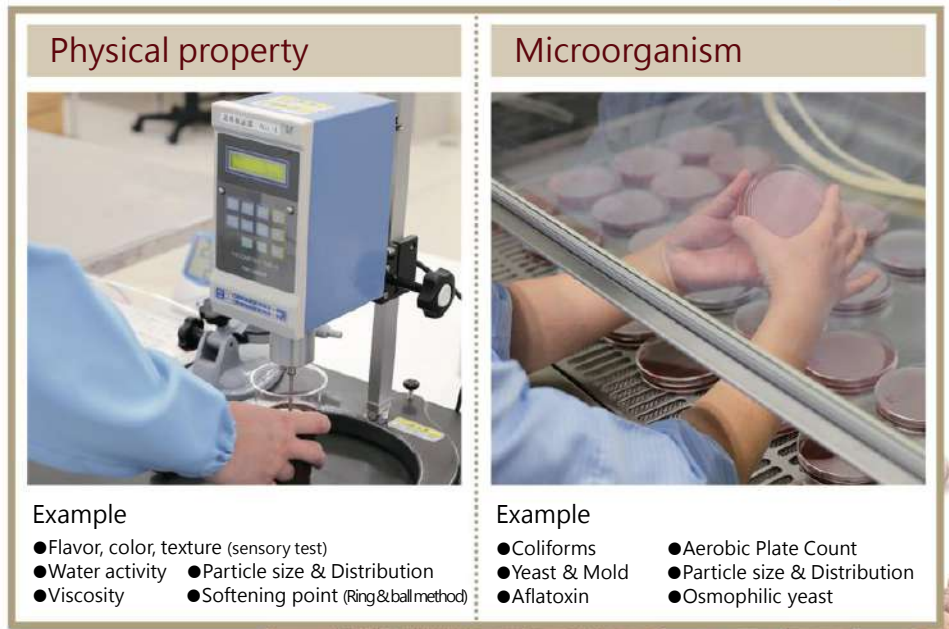

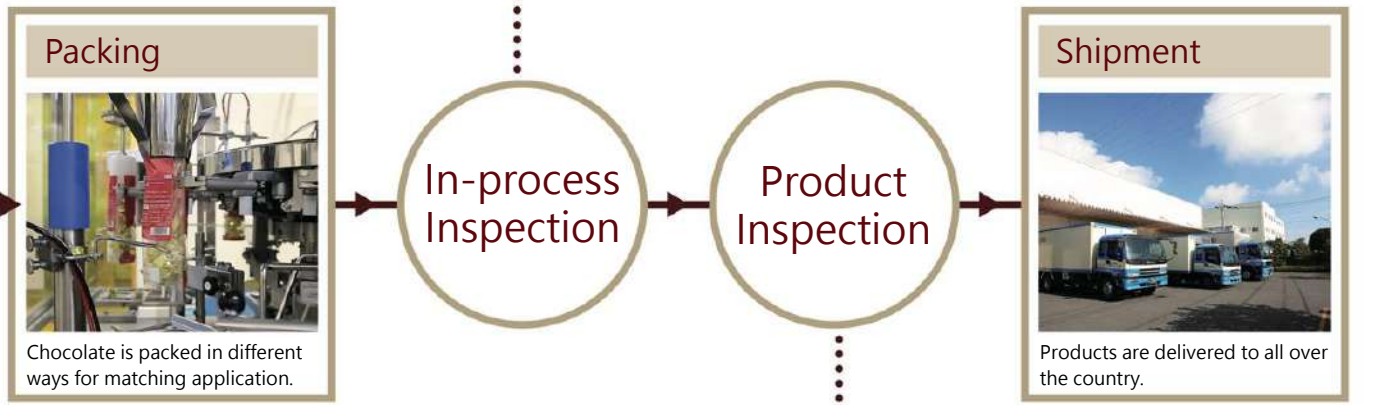

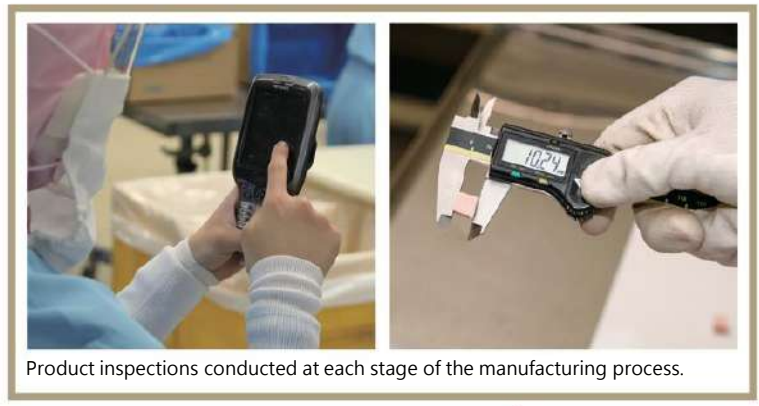

MANUFACTURING PROCESS · PRODUCTION MANAGEMENT

High-quality processing is realized by using a manufacturing management system

It is the main topic for a maker that responding to the expectation of customs and producing products in time. Makers are asked to produce high-quality products precisely and efficiently because products tend to become great varieties, but small amount. From chocolate processing, forming to product examination, all of the production information manage by a manufacturing management system, which controls all the production information in a unified management.

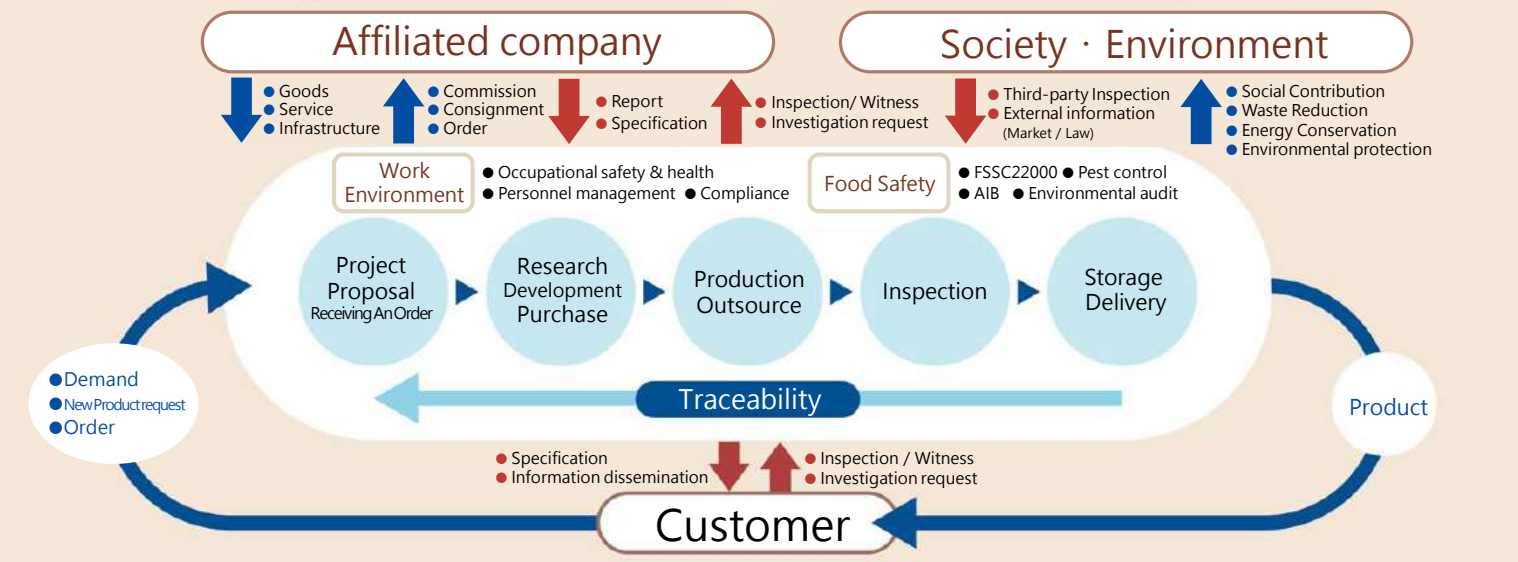

Product Inspection · Shipment

Safety and Security Strategies

Providing safe and secure product and service by using our unique quality management system

As a food material maker, Tokyo Food deems it an honor that providing safe and secure product and service is the most important mission. The whole company is making an effort in improving this quality management system. In order to improve the quality of food safety and enhance customer confidence, our Main and Second factory got FSSC22000 certificate in 2016. Furthermore, in order to pursue a further hard demand of safety and security, we keep improving our quality management system, such as adopting AIB system, etc.

Schematic Diagram of Quality Assurance Process
